Application/Control Number: 10/581,348

Art Unit: 1616

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-4, 6-20 (all in part), drawn to a pesticidal composition and method comprising a combination of an anthranilamide of formula (I) + a benzoylurea.

Group II, claims 1-4, 6-20 (all in part), drawn to a pesticidal composition and method comprising a combination of an anthranilamide of formula (I) + a macrolide.

Group III, claims 1-4, 6-20 (all in part), drawn to a pesticidal composition and method comprising a combination of an anthranilamide of formula (I) + a diacylhydrazine.

Group IV, claims 1-2, 4, 6-20 (all in part), drawn to a pesticidal composition and method comprising a combination of an anthranilamide of formula (I) + Trichogramma spp.

Group V, claims 1-2, 4, 6-20 (all in part), drawn to a pesticidal composition and method comprising a combination of an anthranilamide of formula (I) + Verticillium lecanii.

Group VI, claims 1-4, 6-20 (all in part), drawn to a pesticidal composition and method comprising a combination of an anthranilamide of formula (I) + fipronil or ethiprole.

Group VII, claims 1-2, 4, 6-20 (all in part), drawn to a pesticidal composition and method comprising a combination of an anthranilamide of formula (I) + cyromazine.

Group VIII, claims 1-2, 4, 6-20 (all in part), drawn to a pesticidal composition and method comprising a combination of an anthranilamide of formula (I) + azadirachtin.

Group IX, claims 1-2, 4, 6-20 (all in part), drawn to a pesticidal composition and method comprising a combination of an anthranilamide of formula (I) + diofenolan.

Group X, claims 1-4, 6-20 (all in part), drawn to a pesticidal composition and method comprising a combination of an anthranilamide of formula (I) + indoxacarb.

Upon electing one of the invention groups I to X, applicant is further required to elect for examination purposes a single disclose species of anthranilamide of formula (I)

and a single disclosed species of the second pesticidal compound, if appropriate. For example, a responsive election could include: Group I, compound I-1-9 as the single disclosed anthranilamide species of formula (I) and triflumuron as the single disclosed benzoylurea species.

The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons.

Under lack of unity rules, unity of invention exists only when there is a technical relationship among the claimed inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" is defined as meaning those technical features that define a contribution which each of the inventions, considered as a whole, makes over the prior art. The "contribution over the prior art" is considered with respect to novelty and inventive step.

Here, the technical relationship among the claimed inventions is in the use of anthranilamides of formula (I). However, the anthranilamides of formula (I) are taught as pesticides and taught to be combined with various known pesticides in WO 03/015519 (published 2/27/2003). Therefore, the common technical feature among the ten invention group fails to define a contribution over the prior art and there is no technical relationship among the claimed inventions involving one or more of the same or corresponding special technical features.

For these reasons, the claims lack unity of invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention and species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof.

Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case.

Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to JOHN PAK whose telephone number is **(571)272-0620**. The Examiner can normally be reached on Monday to Friday from 8 AM to 4:30 PM.

Application/Control Number: 10/581,348 Page 5
